ABOUT ME

- Computer Engineering graduate from Vidyalankar Institute of Technology (CGPA: 9.9) with strong proficiency in Python and backend development. Experienced in building data-driven applications involving API integration, web scraping, and structured data processing. Skilled in Flask, MySQL, and Git, with hands-on experience in open-source collaboration. Passionate about writing clean, scalable, and maintainable code while building impactful software solutions.

EDUCATION

Vidyalankar Institute of Technology Bachelor of Technology in Computer Engineering • CGPA: 9.9 (First Year), SGPA: 10.0 (Sem 3) • Expected Graduation: 2028 • Relevant Courses: Database Management Systems, Object-Oriented Programming, Data Structures & Algorithms	Mumbai, India Sept 2024 – Present
R.T.P College (State Board) Class XII • Percentage: 81.83%	Dombivli, India 2024
Arya Gurukul (CBSE Board) Class X • Percentage: 95%	Kalyan, India 2022

EXPERIENCE

Open World Holidays Framework Open Source Contributor • Translated Nepali and Bangladeshi holidays for all public holidays, ensuring correct regional names. • Maintained tests and collaborated with global maintainers to ensure proper integration and consistency. • Gained hands-on experience with Git, pull requests, code reviews, and contributing to a widely used open-source project.	Remote 2025

PROJECTS

Amazon Competitor Analysis Tool <i>Python, Streamlit, Oxylabs, LangChain</i> • Built a Streamlit market research app that analyzes Amazon products via ASIN and displays competitor insights in a clean dashboard. • Implemented Oxylabs-powered web scraping to extract product, competitor listings and store results locally using TinyDB. • Used LangChain with OpenAI to generate structured AI-driven market reports, positioning analysis, and actionable recommendations.	GitHub
Weather Forecast Application <i>Python, Tkinter, OpenWeather API</i> • Developed a Tkinter-based weather app showing real-time weather and 5-day forecasts worldwide. • Integrated geolocation and timezone detection for accurate local time and coordinates. • Displayed temperature, pressure, wind speed, and dynamic icons in a clean UI.	GitHub
Aim Trainer Game <i>Python, Pygame</i> • Developed a Pygame-based aim trainer to improve reaction time and targeting skills. • Implemented dynamic targets with growing/shrinking mechanics, scoring, and limited lives. • Displayed real-time statistics: hits, accuracy, speed, and elapsed time in a clean UI.	GitHub

SKILLS

Programming Languages : C, Python, Java
Web Technologies : HTML, CSS, Flask
Databases : MySQL
Developer Tools : Git, GitHub, VS Code
